Knox County Water/Sewer Customers

Knox County Water/Wastewater Department announces a \$2.00 rate increase for both water and sewer services effective with the March 2023 bill. Due to increase in material and energy costs over the last two years, we are no longer able to absorb the expenses without an increase in rates. This department is funded solely with utility fees and does not receive any tax dollars.

Subsequent increases for January 2024 and January 2025 will be the same.

Fortunately, we have been able to perform several capital improvements with the use of American Rescue Plan Act (ARPA) funds instead of raising rates higher. If you would like to see a list of these projects please visit our website at <https://co.knox.oh.us/water-wastewater/>.

Please be assured we are making every effort to reduce costs and source materials from various vendors to keep our expenses down and still comply with EPA requirements.

Kindly Regards,

Jeffery J Pickrell
Director Knox County Water-Wastewater
